## Cost and infrastructure efficiency: examples of initiatives In EUR m

End 2011 potential run-rate cost saving

Functional alignment of IT operating model:

- Elimination of duplication
- Functional integration and standardisation of processes (app. dev., production mgt.)
- Maximising value from of vendor management and outsourcing
- Maximum benefit of low-cost locations
- Platform efficiencies (Berliner Bank, GTB integration)

Transition to next generation operating model:

- Lean process redesign
- Further use of low-cost locations
$\approx 150-200$
- Continued standardisation of processes
- Automation (elimination of manual processes)

Legal, Risk \& Capital Implementation of Global Efficiency Model:

- Redefine core and optimise non-core activities
- Strict risk / return discipline in portfolio / coverage
$\approx 100$
- Integrated delivery model
- Increase outsourced footprint

(5)
(2) Other includes dividend accrual and actuarial gains/losses on pension plans Contains EUR 1 bn market risk Sal. Oppenheim Contains EUR 1.6 bn operational risk Sal. Oppenheim Credit Risk RWA only

## Sovereign risk

Concerns about sovereign risk - potential tertiary effect through contagion

CDS spreads by country (in bps)

DB exposures ${ }^{(1)}$ by country, 31 Mar 2010

```

```

...but potential risk of tertiary market impact
due to contagion

Sovereign: Overall relatively small, except Italy
CIB: Focus on better rated clients; corporates / FIs with satisfactory diversification \& risk mitigation
PBC: Large presence in Spain and Italy, mitigated by low concentration risk and collateral

Significant spread widening could lead to losses on our illiquid GM/GB legacy positions
Temporarily reduced liquidity in EU debt and equity markets
European banks with significant cross border funding would exhibit renewed stress

## Modest reliance on shorter term wholesale funding In EUR bn

## Funding sources overview

## Liquidity position

- Secured funding increase mainly against highly liquid trading assets
- Incremental discretionary wholesale funding more than offset by increase of available cash balances
- Available cash and strategic liquidity reserve exceed net funding gap under combined stress scenario
- YTD execution of 2010 issuance volume well ahead of plan ( $>50 \%$ of EUR 19 bn plan)

Unsecured funding and equity
Note: Figures may not add up due to rounding differences
(1) Other includes fiduciary, self-funding structures (e.g. X-markets), margin / Prime Brokerage cash balances (shown on a net basis)
(2) Includes ABCP conduits

## Key takeaways

- Significant capital buffer; above targets
- Future retained earnings potential
- Fresh capital for buying new earnings streams (only)
- Substantial liquidity reserve
- Diverse unsecured funding base
- Profit growth of core businesses
- Infrastructure efficiency gains

In all aspects: Positioned to deliver on Phase 4

## Cautionary statements

This presentation contains forward-looking statements. Forward-looking statements are statements that are not historical facts; they include statements about our beliefs and expectations and the assumptions underlying them. These statements are based on plans, estimates and projections as they are currently available to the management of Deutsche Bank. Forward-looking statements therefore speak only as of the date they are made, and we undertake no obligation to update publicly any of them in light of new information or future events.

By their very nature, forward-looking statements involve risks and uncertainties. A number of important factors could therefore cause actual results to differ materially from those contained in any forward-looking statement. Such factors include the conditions in the financial markets in Germany, in Europe, in the United States and elsewhere from which we derive a substantial portion of our revenues and in which we hold a substantial portion of our assets, the development of asset prices and market volatility, potential defaults of borrowers or trading counterparties, the implementation of our strategic initiatives, the reliability of our risk management policies, procedures and methods, and other risks referenced in our filings with the U.S. Securities and Exchange Commission. Such factors are described in detail in our SEC Form 20-F of 16 March 2010 under the heading "Risk Factors." Copies of this document are readily available upon request or can be downloaded from www.deutsche-bank.com/ir.

This presentation also contains non-IFRS financial measures. For a reconciliation to directly comparable figures reported under IFRS, to the extent such reconciliation is not provided in this presentation, refer to the 1Q2010 Financial Data Supplement, which is accompanying this presentation and available at www.deutsche-bank.com/ir.
